

ISoP Policy on “In Memoriam”

ISoP will add to its website an “In Memoriam” page and include a link for people to notify ISoP of a member’s death. On this web page, ISoP may also include a link from a name to an obituary or to external websites to make a donation in the member’s name or offer condolences, if such links are provided and/or available. ISoP may also acknowledge deceased members in the quarterly newsletter. The death of leading figures in the field, who are not ISoP members and have made seminal contributions to the discipline, may also be acknowledged on the website and newsletter if requested by ISoP members or external parties and confirmed by the Communications Committee. Please send any obituaries to the Communications Committee Chair. The ISoP Communications Committee will have final say concerning content and format of any obituary notices on both the website and in the newsletter. Decisions by the Communications Committee may be modified by the Board of Directors.

Obituaries should include the following content:

- the deceased's name;
- age at time of death;
- hometown;
- date of death;
- education;
- key accomplishments in pharmacometrics and research in general;
- if available, an e-mail or mail address for use by individuals who wish to send condolences or memorial contributions;
- name of author of the obituary.
